

University of Maryland Internal Medicine/Pediatrics Residents

Class of 2025

Leah Daniel, M.D.

Medical School: Loma Linda University School of Medicine

I was raised in Silver Spring, MD and went to the University of Maryland in College Park for my undergraduate degree. I decided to try something different and moved across the country to Southern California to attend Loma Linda University for medical school. I loved my time in California and getting to explore the West Coast. I'm super excited to be back home in Maryland and to start this new Med/Peds journey in Baltimore! I am interested in community medicine and am looking forward to finding new interests and opportunities during residency. In my free time, I love traveling, checking out new food spots, reading, painting, pilates, and honestly anything that involves a good time with friends and family.

Simin Hossain, M.D.

Medical School: University of Maryland School of Medicine

Hi everyone!

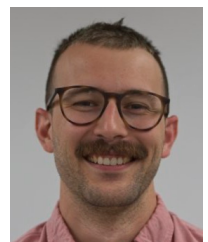

I was born in Ahvaz, Iran but grew up in my home country, Bangladesh, for most of my childhood. I moved to the second place I call home, Maryland, when I was 15 and have been here ever since! I attended UMBC (University of Maryland Baltimore County) and majored in biochemistry. Afterwards, I went to the University of Maryland School of Medicine to get my medical degree. I initially wanted to be a pediatrician but quickly realized that I also love talking to adults, so I chose to pursue my residency in Med/Peds. I am so excited to stay at Maryland and continue caring for the patient population in Baltimore with the wonderful faculty and co-residents! My current career plan is to become a cardiologist (either adult or peds) someday. Outside of medicine, I love to paint, explore new restaurants, go hiking and play board games.

Justin Klucher, M.D.

Medical School: University of Arkansas College of Medicine

I am a born and raised Arkansas native from North Little Rock, AR. Following high school at North Little Rock High School, I attended undergraduate at the University of Arkansas in Fayetteville, AR where I initially started as a biomedical engineer, but quickly found engineering did not excite me. I jumped the engineering ship to double major in Biology and Biochemistry mostly to take virology and bacteriology courses I couldn't fit in my loaded engineering schedule. I didn't exactly know at the time I wanted to go to medical school, but quickly followed my growing interests in Infectious Diseases to attending medical school at UAMS where I met the two loves of my life, my now wife, Bri Klucher, (a soon to be phenomenal UMMS EM resident) and medicine. Every flavor of medicine was my favorite, adults and kids, and so combined

Medicine and Pediatrics was the perfect residency for me. Coming to Baltimore from Little Rock, AR was a big jump for us, but we really wanted to try something different, see new people, and experience what medicine has to offer in a different part of the country. So here's to learning a new career and a new city with new friends all in one big package.

I have two dogs, Freya and Scully and when I'm not enjoying video games or TV, I love spending my time hanging out with friends whether it be over a board game, with some beers, or somewhere on a hike. I am super excited to be somewhere so full of energy, culture, and most importantly good food, to spend my formative years as a fresh doc!

Emily Toler, M.D.

Medical School: University of Maryland School of Medicine

I was born and raised in Towson, Maryland. I graduated from Johns Hopkins University with a B.S. degree in Molecular and Cellular Biology. I then attended the University of Maryland School of Medicine, where I earned my medical degree. Having lived in Maryland my whole life, I'm thrilled to be staying here for Med-Peds residency! I love being close to family, and I look forward to continuing to work with such wonderful friends and mentors here! Currently, I am interested in being a Med-Peds hospitalist, and I'd like to be involved in medical education. In my free time, I enjoy hiking, gardening, baking and cooking. I also enjoy doing trivia, going to the movies and watching musical theater. I love the Baltimore area and am an avid Ravens and Orioles fan.

Class of 2026

Gregory Goshgarian, M.D.

Medical School: Central Michigan University College of Medicine

I was born and raised in Los Angeles, CA, and stayed close to home for college, attending undergrad at USC. During my many gap years after college I moved to the UK to study health policy and economics at the London School of Economics/London School of Hygiene and Tropical Medicine, Switzerland to work with the WHO, New York to study epidemiology at Columbia University, and finally back to Los Angeles to work briefly before medical school. Knowing medicine was my passion, I moved to Michigan for medical school to attend Central Michigan University. I always enjoyed working with children, volunteering throughout high school and college at various camps and schools, but in medical school I found I also enjoyed adults and discovered Med/Peds to be my people! I'm thrilled to be in Baltimore for the next 4 years, and all the adventures it will bring! When I'm not in the hospital I enjoy exercising, playing sports, traveling, cooking, baking bread, and being with my fiancé, family, and friends!

Sylvia Lane, M.D.

Medical School: University of Vermont College of Medicine

I am a born and raised New Englander! I grew up in a small, rural town in Massachusetts before moving to Vermont for higher education. At the University of Vermont, I received my undergraduate degree in biology and psychology and fell in love with hiking and exploring the outdoors. Loving Vermont, I decided to stay for my medical education. In working with the incredible physicians there, I found my passion for medical management of complex medical illness across the age spectrum. I am ecstatic to move to warmer weather and the more populous

city of Baltimore! I am excited to learn from and care for the patients of this city. My career path is still undecided, but I am interested in hospital medicine, palliative care, and critical care. Outside of medicine, I love to try new foods, bake (perfecting various cookie recipes is my specialty), watch movies, explore farmers' markets, dance, and grow my own vegetables. I am thrilled to join the community here at University of Maryland and cannot wait to see what Baltimore has to offer!

Alexa Rangecroft, M.D.

Medical School: Wake Forest University School of Medicine

I lived most of my life in Princeton, NJ and spent my middle school years in London. During undergrad at Johns Hopkins, I played soccer, studied French and History of Art, and fell in love with the city of Baltimore. I took a gap year and worked at a nonprofit teaching high school students in Washington DC. I continued my journey South by going to medical school at Wake Forest in Winston Salem, NC (Go Deacs!).

I've always known I wanted to help people in need and when I learned about the great work done by Doctors without Borders and the World Health Organization- I knew medicine was for me. Med-Peds seemed like an even more perfect fit as I can train to help both adults and children with anything from lifestyle changes to ICU-level care needs.

I'm so excited to be back in Baltimore, serving a community I love and meeting my amazing colleagues at UMMC. I can't wait to cheer on the Ravens and Orioles, find a regular pub trivia spot, and walk my dog, Pancake, around the Inner Harbor for the next four years.

Alexandra Rogalski, M.D.

Medical School: University of Maryland School of Medicine

I was born in Washington, D.C. and raised in Bethesda, Maryland so the DMV has always been home. I attended St. Mary's College of Maryland for undergrad, followed by the University of Maryland School of Medicine for medical school. I am thrilled to be staying at Maryland and officially joining the Internal Medicine-Pediatrics residency family! Pediatrics has always held a special place in my heart, tracing back to when I was a kid and had a phenomenal pediatrician. She always made sure the doctor's office was never a scary place, encouraged me to take an active role in my own health, and set an example for the type of dedicated, intelligent, and empathetic physician I aspire to be. I am thrilled to have the opportunity to continue caring for Baltimore's children and their families alongside my wonderful co-residents and attendings. My experiences during my Pediatrics rotations in medical school were integral in helping me decide on pursuing Med-Peds and I cannot wait to keep building on these as a resident.

Outside of the hospital, I enjoy spending time with my friends and family, catching a baseball game, traveling to new places whenever I can, and jogging. I also love exploring Baltimore and getting to know all that its different neighborhoods have to offer. It is easy to see why there is so much pride in being a resident of Baltimore and I am so glad to be able to continue calling it home for the next 4 years!

Class of 2027

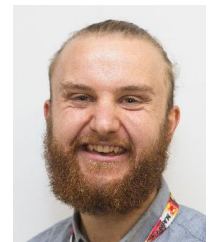

Camille Knable, M.D.**Medical School:** Tulane University School of Medicine

Hey I'm Camille! I grew up in Montgomery County, Maryland and studied Environments & Sustainability at the University of Virginia. Later, I spent two years living in rural Paraguay, where my interest in environmental justice and its intersection with community-led health care models grew. These experiences encouraged me to pursue a Masters in Public Health during my time in medical school at Tulane University in New Orleans. While I'll miss New Orleans deeply, my partner and I are thrilled to call Baltimore home and to connect with this community! You can find me attempting ollies on my skateboard, reading dystopian (non)fiction, and surveying the Baltimore ice cream and snowball scene.

Vivek Krishnan, M.D.**Medical School:** Wake Forest University School of Medicine

I was born and brought up in south India until I was eleven, after which my family moved to the US. Since then, I have lived in Delaware, Michigan, and North Carolina so I don't really have a hometown! I attended college at the University of Michigan where I became a die-hard Wolverine, and also double majored in Neuroscience and Spanish. After college, I took two gap years working as a Nursing Assistant and volunteering as a Spanish Medical Interpreter before enrolling at the Wake Forest School of Medicine. In medical school, I realized I would not have a fulfilling career without being able to treat both adults and children, and ultimately settled on Med-Peds! I am so excited for this next chapter of my career at an amazing institution working with a diverse, urban patient population, and to explore the charming city of Baltimore!

In my free time, I enjoy bouldering/rock-climbing, skiing, going on adventures with my dog Luna, exploring breweries and nightlife, going to concerts and music festivals, and traveling!

Jacob Miller, M.D.**Medical School:** University of Maryland School of Medicine

I'm a proud Marylander hailing from Prince George's County. I love it here so much that I've stuck around for all of my education and training! I studied biology and Spanish at the University of Maryland, College Park right down the street from where I grew up. For medical school I made the long trek up 95 to the University of Maryland, Baltimore. I am passionate about empowering families in this great city to lead healthy lives on their terms through education and collaboration. In my free time I enjoy hiking with my family, running around the harbor, gardening, baking, woodworking, and backpacking. My wife, daughter, two dogs, cat, and I are all excited to spend another four years here in Baltimore!

Obichi Onwukwe, M.D.**Medical School:** Case Western Reserve University School of Medicine

I was born in Nigeria, and grew up in Bowie, Maryland since the age of 9. For undergrad, I majored in Physiology/Neurobiology at the University of Maryland, College Park. I then moved to Cleveland for medical school at Case Western Reserve University. I absolutely loved my internal medicine and pediatrics rotations during medical school,

and I am super excited to be back home doing both! I am also really passionate about patient education and global health, and I'm looking forward to working on projects involving either (or both).

During my free time, you can almost always find me watching too many movies and trying new foods and activities. My favorite activities right now are running, working out, indoor rock climbing, rollerskating, and (poorly) iceskating!

Class of 2028

Sara Miller, M.D.

Medical School: University of Maryland School of Medicine

Hi! I was born and raised in Howard County Maryland. I went to the University of Maryland College Park for Undergrad majoring in cell bio and genetics. I took time off between medical school to do research, work as a medical and surgical assistant, and teach swim lessons. I attended the University of Maryland School of Medicine and fell in love with the city of Baltimore! I am so excited to stay here for residency and continue to care for the wonderful people of Baltimore. Outside of medicine, I love baking and cooking new recipes for friends and family. I also love spending time outdoors, hiking and kayaking when the weather is just right. I am a devoted cat mom and love anything with the Maryland flag on it (the best state flag). I also love expressing my creative side through painting and attending shows at Baltimore's many theaters and music venues.

Jasmine Pringle, M.D.

Medical School: University of Virginia School of Medicine

Hi! I was born in Pensacola, FL, and bounced around a ~little~ as a child (military family), but I claim Northern VA as my hometown. I went to Duke University for undergrad and majored in Neuroscience with a minor in Chemistry. My interest in medicine started after I watched a movie in 8th grade that made me want to be a Pediatric Oncologist. I spent a year after college in divinity school looking at how theology, medicine, and culture influence each other. I then went to the University of Virginia for medical school and realized that as much as I love kids, I equally love adults (I, too, was shocked), so now I am looking for a way to combine both in my future practice. I am so happy to be able to take care of the people of Baltimore, a city I love while being close to home. I love to eat, mindlessly watch TV, read, hang out with my friends, and throw elaborate theme parties (ask me about when I got fake married).

ET Todd, M.D.

Medical School: East Carolina University Brody School of Medicine

Hi, I'm ET! I'm originally from Durham, NC, made my way up to Boston to attend Northeastern University for undergrad as a behavioral neuroscience major with a Spanish minor, came back to Durham to work as a dermatology medical assistant for a couple of years, and then attended East Carolina University in Greenville, NC for medical school. The personalities and breadth of med-peds drew me in during M3, and I'm thrilled to have landed at UMMC! Long-term, I'm interested in LGBTQ health, primary care, and policy/advocacy, though, in classic med-peds fashion, I'm staying open to the possibility that I might end up doing something completely different. When I'm not at work, I enjoy singing in choir (looking to join a local one), reading (largely sci-fi and fantasy, but lately on a historical fiction kick), cooking and baking, tending

my dozen houseplants, spending time with my girlfriend Sarah, admiring other people's cats, hanging out with friends, finding new restaurants, and taking myself on little walks.

Gideon Wolf, M.D., Ph.D.

Medical School: University of Maryland School of Medicine

Hey all, my name is Gideon, born and raised in the great state of Maryland. I went to New York City for college where I first was thinking about majoring in archaeology, but then switched to biological anthropology. After college, I took some time to do research at the NIH, and then returned to Baltimore to go to the UMD school of medicine. I found myself missing research, so I hopped into the combined MD-PhD program, and eight (!?) years later, here we are. My career interests are in allergies and immunology, but still figuring out my exact path! Non-work interests are hiking, camping, rock climbing, fishing, and spending time with my wife and cat. So excited to continue my journey here at UMD!
